

## RESPONSIBLE WASTE MANAGEMENT & SUSTAINABLE LIFESTYLE IN THE ISLAND OF BALI

Eco Bali was established in 2006 in response to the urgency of waste management problems in the island of Bali.

Our Vision is to enable everyone towards a zero-waste lifestyle. Our Mission is to promote responsible waste management, create green knowledge and eco products towards achieving zero waste. Our team includes professionals experienced in waste management, educational programs, product design and marketing.

We are operating our own sorting and material recovery facility (MRF) ensuring that your waste is properly managed and will not become a burden to Bali's beautiful environment. Our focus is to maximize recycling, reduce quantity of waste to landfill and promote composting. We guarantee the disposal of the remaining residue only in legal facilities.
